

I have $\frac{12}{12}$
(the same as ONE)

Who has $\frac{12}{12}$
take away $\frac{4}{8}$?

I have $\frac{4}{8}$

Who has $\frac{4}{8}$
plus $\frac{2}{8}$?

I have $\frac{6}{8}$

Who has $\frac{6}{8}$
take away $\frac{4}{8}$?

I have $\frac{10}{12}$

Who has $\frac{10}{12}$
take away $\frac{3}{12}$?

I have $\frac{7}{12}$

Who has $\frac{7}{12}$
plus $\frac{2}{12}$?

I have $\frac{9}{12}$

Who has $\frac{9}{12}$
takeaway $\frac{8}{12}$?

I have $\frac{1}{12}$

Who has $\frac{1}{12}$
plus $\frac{7}{12}$?

I have $\frac{8}{12}$

Who has $\frac{8}{12}$
plus $\frac{3}{12}$?

I have $\frac{11}{12}$

Who has $\frac{11}{12}$
plus $\frac{1}{12}$?

I have $\frac{2}{8}$

Who has $\frac{2}{8}$
expressed in
fourths?

I have $\frac{1}{4}$

Who has $\frac{1}{4}$
plus $\frac{3}{8}$?
(hard problem.)

I have $\frac{5}{8}$

Who has $\frac{5}{8}$
in sixteenths?

I have $\frac{10}{16}$

Who has $\frac{10}{16}$
take away $\frac{5}{16}$?

I have $\frac{5}{16}$

Who has $\frac{5}{16}$
plus $\frac{4}{16}$?

I have $\frac{9}{16}$

Who has $\frac{9}{16}$
take away $\frac{1}{16}$?

I have $\frac{8}{16}$

Who has $\frac{8}{16}$
plus $\frac{5}{16}$?

I have $\frac{13}{16}$

Who has $\frac{13}{16}$
plus $\frac{2}{16}$?

I have $\frac{15}{16}$

Who has $\frac{15}{16}$
take away $\frac{8}{16}$?

I have $\frac{3}{4}$

Who has $\frac{3}{4}$
take away $\frac{1}{4}$?

I have $\frac{2}{4}$

Who has $\frac{2}{4}$
in lowest terms?

I have $\frac{1}{2}$

Who has $\frac{1}{2}$
expressed in
twelfths?

I have $\frac{6}{12}$

Who has $\frac{6}{12}$
take away $\frac{2}{12}$?

I have $\frac{4}{12}$

Who has $\frac{4}{12}$
in lowest terms?

I have $\frac{1}{3}$

Who has $\frac{1}{3}$
plus $\frac{1}{3}$?

I have $\frac{2}{3}$

Who has $\frac{2}{3}$
expressed in
sixths?

I have $\frac{4}{6}$

Who has $\frac{4}{6}$
plus $\frac{1}{6}$?

I have $\frac{5}{6}$

Who has $\frac{5}{6}$
in twelfths?

I have $\frac{7}{16}$

Who has $\frac{7}{16}$
take away $\frac{3}{16}$?

I have $\frac{4}{16}$

Who has
three times $\frac{4}{16}$?

I have $\frac{12}{16}$

Who has $\frac{12}{16}$
in lowest terms?
