

Make 20

Focus of game: Addition facts to 20

Players need:

- 6 counters each
- Two Dice 1–6
- Row of 'Make 20' squares

Playing the game

- First player rolls the two dice.
- Add the two numbers together and if the numbers thrown can be added to any one of the numbers in the squares to make 20, cover that square with a counter.
i.e. Roll 6 and 2—equals 8 so can cover 12.
- Take turns to roll the dice.
- First player to cover up all of their squares is the winner.

Rolled 6 and 6 = 12
so $12 + 8 = 20$

Rolled 6 and 4 = 10
so $10 + 10 = 20$

12	8	17	14	10	13
