Partition

Game - how to play

- Take it in turns to throw a die and move that number of places.
- 'Explode' the number you have landed on into its 'tens' and 'units' parts.
- Claim the parts by covering them with your coloured counter - land on 23 cover 'a '20' and a '3'.
- If any part of your number is not available you cannot claim that number and you 'lose' that turn.
- The winner is the one with the most parts covered.
